Maintenance

Whether the need is purely routine planned preventative maintenance, the incorporation of full breakdown and 24hr emergency cover, or full time manned site attendance, DVBS has been structured to react promptly and efficiently.

Air Conditioning

Our engineers have the expertise to meet your needs from either maintenance or installation of individual split air conditioning units, to maintenance of central chilled water plant.

Mechanical Services

Correct operation of pumps, booster sets, pressurisation units, fans and associated equipment is essential to ensure safe and uninterrupted service for water supplies, heating and ventilation. Our service department maintain, replace and upgrade plant with minimal disruption.

Electrical Services

In addition to low voltage switchgear, electrical risers, power and lighting circuits, DVBS also maintain control panels for mechanical plant and system controls.

Ventilation

Maintenance of complete ventilation systems incorporating ductwork cleaning and monitoring of air quality form part of our service.

Heating

Our CORGI registered engineering staff are fully conversant with commercial heating systems and we are able to provide both maintenance and installation services as well as landlord gas safety certification.

Our management team are not only skilled in the technical element of the industry, but are able to apply their knowledge to assist their clients in:

- Short term budget formation
- Long term budget formation
- Maintenance planning
- Plant dilapidation reports
- Effects of office fit out

Quality of Service

Darenth Valley Building Services combined management experience of maintenance has resulted in a company with the ability and resources to provide a service for almost any building services maintenance related requirement.

Experience tells us that the key to ensuring a prompt and efficient service is to implement a single point of contact for our clients. This is achieved by allotting each client to one of our Senior Managers, who are recognised as the standard setters in our industry.

In addition to our management team, customers have direct access to our helpdesk, which is operated from our main offices. It is from these offices that all maintenance attendance and emergency call requirements are dealt with, and where our management team is based.

Our engineering and management staff are skilled in identifying, anticipating and satisfying their client's needs. Everyone at Darenth Valley Building Services is experienced at working as part of a team.
